

# SCIENCE

Our agreed consistencies for Science:	If you were to walk into a Science lesson at Sandhurst you would see:	In our Science curriculum you will see that we value inclusion and diversity:
<p>Every class has a weekly science lesson</p> <p>We use Cornerstones to ensure progression and thorough coverage.</p> <p>Classrooms display knowledge organisers and vocabulary for current topics.</p> <p>Where possible, all topics will offer practical, hands-on investigations</p> 	<p>Children developing a bank of skills and an understanding of the processes required to be able to undertake good science.</p> <p>Learning to understand that scientific questions can be answered by different types of scientific enquiry</p> <p>The use of thoughtful questioning using age-appropriate scientific vocabulary relating to the skills and subjects being taught.</p> <p>Use of equipment to support teaching and learning.</p>	<p>Teaching is tailored to the strengths and needs of the class.</p> <p>Provision is made for children who require additional support.</p> <p>We challenge stereotypes of scientists</p>
